STRENGTHEN COMMUNITY BENEFIT IMPACT

2025 Community Health Needs Assessment and Implementation Strategy Priorities

A Community Health Needs Assessment (CHNA) identifies community assets, needs and the current state of the health and social well-being of a community. The process requires input from those who live in the community on both identifying and prioritizing the needs that will be addressed in the three-year Implementation Strategy. Trinity Health Ann Arbor found these three needs to be the most significant:

Mental Health
(Including Substance Use)

Access to Service

Housing

Our Community Impact by the Numbers

\$357 million in Trinity Health Michigan Community Benefit and Impact Activities

The IRS has clearly defined standards for reporting community benefit which include unpaid Medicaid financial assistance, subsidized health services, cash and in-kind contributions, and other community programs.

Community Impact meets the spirit of community benefit and acknowledges the investments made that are making an impact in the community that the IRS does not consider.

INVESTMENTS IN OUR COMMUNITY

TRINITY HEALTH ANN ARBOR

ADDRESS PATIENT SOCIAL NEEDS

Community Interventions

Community interventions are hospital-based services, programs, and activities that promote health and healing as a response to identified community needs. They increase access to health care addressing social influencers of health (SIOH), improve access to health care services and reduce health disparities within our service areas.

Wash & Care: A program to address laundry care as a critical social need, offering financial relief while using laundry time to connect patients with additional resources.

Project Success: A middle school and high school-based program where counselors work to increase factors that protect students from substance use and decrease factors that put students at risk with substance use.

Community Health Workers (CHW): CHWs serve as a link between health/social services and the community. Their work facilitates access to services that improve the overall health and wellness of the communities they serve. In-patient CHWs screen patients for health-related social needs.

Patient Social Care Fund: Provides financial assistance for essential services that address urgent patient social needs.

Senior Fit: A program designed to increase the vigor, strength, and balance of the senior community (ages 55+) which reduces the risk of falling and provides a framework for a healthy lifestyle.

Internship Program: Provides educational advancement in various administrative and health-related fields through hands-on experience by executing projects pertaining to the hospital department's goals.

Trinity Health Academy: An educational initiative aimed at bridging the gap between the community and health care through interactive sessions, training and experiences. Sessions are designed to expose participants to hospital programs, engage in meaningful dialogue to foster connections and promote healthier lifestyles.

Community Outreach: The time our team spends supporting community events and engaging with our community members.
