Transitional Year Residency Program

Trinity Health Grand Rapids

Finding Balance

Our program is committed to resident well-being, and we support wellness activities. We foster work-life balance and strive to empower every resident in their work and home.

When surveyed, 100% of our residents agree that they:

- Work in a supportive environment
- Are expected to complete a reasonable amount of work in a day
- Are treated with respect at work
- Participate in decisions at work
- And did not violate duty hours-ever!

Sample Block Diagram
